

# Learning Explorer

## Interactive Learning Platform

**Build engaging lessons with the widest range of instructional resources and activities**—aligned to standards, mapped to your curriculum, and targeted to your students' instructional needs—all in one centralized platform.

### How Does it Work?

#### Organize and manage curriculum

- Incorporate any resources (e.g., unit guides, pacing guides, vertical alignments)
- Tag any resource for search, organization and reuse
- Publish complete or example units and lessons
- Share curriculum framework with teachers

#### Build lessons, homework, remediation and enrichment

- Drag & drop resources and activities into lessons, homework or instructional units
- Enrich, organize and personalize lessons
  - Add your favorite external resources or activities
  - Add instructions, notes and quizzes to resources and activities
- Share and collaborate with colleagues, enabling team-based review and editing

#### Search and discover resources and activities

- Centralized content repository of curriculum, instructional resources and activities
  - District-created
  - District-licensed
  - Learning Explorer-provided—with district-level control
- Search the content repository by grade, subject, resource and activity type, standards, concepts, keywords and more

#### Teach synchronously and asynchronously

- Deliver lessons and remediation sessions in the classroom with a seamless, slideshow-like player and playlist experience
- Engage students asynchronously, either in the classroom or remotely by assigning lessons, homework or enrichment via the player, directly in your LMS or classroom system
- Engage parents by sharing homework, enrichment and practice via existing parent engagement and communication systems

## Build lessons from the most relevant instructional resources and activities

Don't spend time jumping between multiple systems and sources of instructional content. With Learning Explorer's all-in-one search, you can quickly find high-quality, relevant resources and activities in a single search—then just drag-and-drop to build lessons, homework, remediation and enrichment.

- Easily access existing district-licensed resources from BrainPOP, Discovery Education, Gale, HMH, McGraw Hill and Newsela—and more—with a single search
- Incorporate district-created materials such as curriculum guides, lessons and videos
- Teachers can include their favorite personal or external resources and activities as they build
- Select expertly curated open educational resources (OER) including articles, activities, lessons and primary sources
- Leverage 2 million ad-free and comment-free educational videos from reputable creators such as Getty, PBS, Smithsonian, SciShow, AP, TED and LearnZillion—right in the Learning Explorer platform

## Drag & drop resources

and activities into student lessons, homework or enrichment units
